For loops
Accumulate
Count sum
Build string
Nested for loops

Start + count * step_size

Read in 10 numbers, count and print the number of evens
Int countEvens = 0;
for (int i = 1; i <=10, i++)
{
        if (i%2 == 0)
        {
        countEvens = countEvens + 1;
        }

}
s_____("number of evens is" + countEvens);
